

“ igroup deliver and support SharePoint for organisations and specialise solely in SharePoint to offer customers expertise and experience ”

Dynamic Forms integrates directly with SharePoint to provide a flexible, user-friendly and intelligent electronic forms solution.

Whenever and wherever you need to gather data, Dynamic Forms is your best choice. Our existing customers have already benefited from its flexible and straightforward nature, by deploying it in a wide variety of situations:

- oil and gas pipeline inspections
- energy conservation reviews and reports
- facilities audits
- proving ISO compliance
- documenting alarm maintenance
- equipment installation, maintenance and servicing

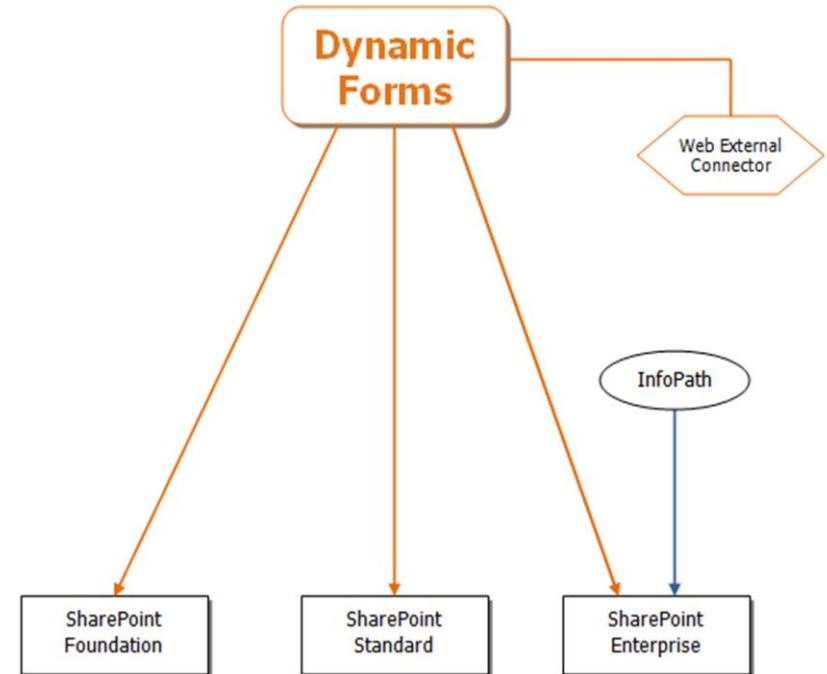

To demonstrate the anywhere/any time capability of Dynamic Forms, we are currently helping a company who want to use it to collect health and safety data from their vessels working alongside oil rigs, so don't think that Dynamic Forms is limited to solid ground!

The main benefits you will enjoy include:

- intelligent, logical process
- flexible
- easy to create forms (no specialist IT skills required)
- works offline and online
- use with PCs, PDAs, laptops, tablets, etc
- instant report production in a range of formats (Word, pdf, etc)
- support from Microsoft professionals

Some of the advantages of the direct integration of Dynamic Forms with SharePoint are:

- send or receive data from any system
- push data in and out of Dynamic Forms with our open standard web services
- data mapping configuration allows easy database field mapping from a backend system
- API (Application Programming Interface) to allow developers to connect systems with our open platform

“ Dynamic Forms converts any paper template to electronic format and allows mobile workers to provide instant feedback on inspections, surveys, or any other field-based activity ”
